# Alberto Redondo Gil

## Computer Science Engineering Student and Automation DevOps Trainee

Curious and always looking forward to learn everything I can. I love discovering new things, exploring alternatives, and thinking about different ways to get to the same result.

## EDUCATION

### Computer Science Engineering Bachelor's Degree
Universidad Complutense de Madrid

*09/2017 - Present*                                        *Madrid*

## WORK EXPERIENCE

### Automation DevOps Trainee
Holcim EMEA Digital Center

*10/2021 - Present*                               *Madrid, Spain*

*Tasks*

- AWS resource management: S3, RDS, EC2, IAM, VPC...
- Infrastructure as Code (IaC) definition using Terraform and Terragrunt (providers: AWS and ElasticCloud).
- Application of the GitOps paradigm to maintain infrastructure using GitHub Actions.
- Slight knowledge about DevOps environment: application deployment in container environments (OpenShift) using CI/CD pipelines (Jenkins), process automation (Ansible Tower) and observability (ELK).

## SKILLS

Linux    Bash    Terraform    Terragrunt    AWS

Git    GitHub    GitOps    C++    C    Java

SQL    Python    Haskell

## CERTIFICATES

C2 English Course (09/2020 - 02/2021)
*CSIM - Universidad Complutense de Madrid*

## ACHIEVEMENTS

Courses passed with honors in Computer Science Engineering Bachelor's Degree
*Fundamentals of Programming, Data structures, Fundamentals of Algorithms, Databases, Technology and Organization of Computer Systems*

## LANGUAGES

Spanish
*Native or Bilingual Proficiency*

English
*Professional Working Proficiency*

## INTERESTS

Linux and system administration    Automation

Shell scripting    Cloud computing

Problem solving through algorithms and data structures

Free and Open Source Software
